

## M5: preserved correspondence helped prediction, not mechanism specificity

a

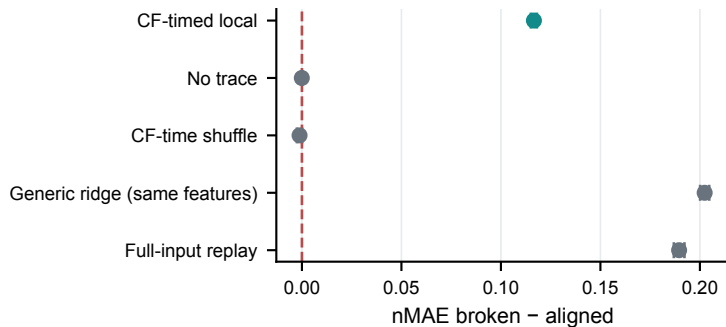

### Fixed local-rule pipeline and correspondence manipulation

Aligned: input–target pairs retained | Broken: targets independently permuted in train and test

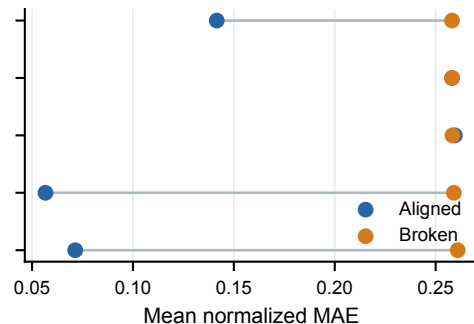

b

### Paired correspondence effect

c

### Regime means (lower is better)

30 paired task seeds; paired-seed bootstrap 95% CIs. Outcome-informed test; full-trial features are offline. Ridge shares 16 features but has a different, smaller head and objective; replay receives all 40 bins.
